Introduction
Symposium on Judicial Administration

INTRODUCTION

The Board of Editors has devoted this portion of the Review to a subject it feels warrants special attention: the administration of justice. While it is not possible within the confines of a single symposium to consider all of the areas in which a hard look at the administration of justice is needed, it is hoped that the articles which follow will serve to provoke thought, discussion, and where necessary, change in the areas that are covered. The symposium addresses the following questions:

What problems arise from the appellate process, and how might they best be solved?
